

Missing Voices

Physical punishment experiences
as described by primary school children

This booklet draws on responses from students aged 8–12 years who participated in my annual Student Voice Postcards initiative via their school.

Answers and drawings are unedited and are in response to open-ended questions about their lives. This booklet is representative of the hundreds of responses that reflect the physical punishment experiences of children.

Since commencing this initiative in 2019, I have received almost 50,000 postcards from South Australian students aged 8–12 years, across Government, Catholic, and Independent primary schools.

These postcards have enabled me to better understand what children are doing, what matters to them, and what concerns they have.

The postcards are just one way to ensure South Australia is meeting its obligations under the United Nations Convention on the Rights of the Child, specifically in relation to providing children with opportunities to express their views on all matters affecting them (Article 12).
